Marijuana Vodka – Potka

Recipe Description:

I love making Potka (Marijuana Vodka). It's one of those set and forget recipes. You simply add the ingredients as listed below and let sit in the sun or other warm place (sunlight is the best though).

Prep Time	Cook Time	Total Time	Recipe Serves	Recipe Yield
30 minutes	30 minutes	12 days	-	750 ml

Equipment Needed:

Empty glass jar or clear wine bottle
 Piece of cheesecloth, enough to fit over the mouth of the jar (or bottle)
 Funnel

Ingredients Needed:

3 Cups of Vodka (any brand)
 1 ounce of marijuana (buds, stems, trim, leaves etc.)

Directions:

1. Fetch your bottle of favorite vodka. You'll only need half the bottle for this recipe.
2. Grab your empty jar. An old spaghetti jar or better, clear glass wine bottle. Make sure you've cleaned not only the jar or bottle, but the inside of the cap.
3. Bring out your weed. This is a great recipe for using up your stems, clippings and small leaves.
4. Take your stems, trim, leaves etc and place into the vessel (jar or bottle). If using a wine bottle, the plant matter typically will not come out. Keep that in mind when recycling or pitching in the

trash.

5. Pour three cups of vodka into the jar or bottle. Of course if you're using an old bottle, use a funnel.
6. Once filled cap and place on a windowsill where no one will disturb it. It's going to sit here for 12 long days... mark your calendar.
7. Once 12 days has passed and you bottle has gotten plenty of fun in the sun, time to transfer your Potka back to the original vodka bottle.
8. Open your vodka bottle and insert funnel.
9. Grab that cheesecloth and place over the mouth of the jar and begin to slowly pour the Potka into the vodka bottle. The cheesecloth will catch all the marijuana stems and such.
10. All transferred? Wash out the jar and get ready for your next batch of marijuana vodka. Cheers!

Notes:

Every couple of days give the bottle a good shake. Chill as it lasts longer when poured over ice.
